

DESIGN FOLLOWS PERFECTION

HAND MADE SINK

NEW

NBCM

A black and white photograph of a craftsman working in a workshop. The craftsman, a man with a beard and glasses, is wearing a light-colored short-sleeved button-down shirt and a dark apron. He is leaning over a workbench, using a hand plane to smooth a piece of wood. His expression is one of intense focus. The background is blurred, showing the interior of a workshop with various tools and equipment. In the top left corner, the words "CRAFTSMAN SPIRIT" are written in a clean, white, sans-serif font.

QUALITY

HAND MADE SINK

MONTHLY CAPACITY
Current monthly capacity 5,000 sets of sinks
Future capacity minimum 10,000 sets of sinks

COMPANY SCALE
3 workshops.
2 major handmade sink production lines
Covers an floor area of 8,000 square meters
Approx. 200 labors

DESIGN
The design team is from Germany.
Facing the urban youth.
"DESIGN FOLLOWS PERFECTION" design concept.

DESIGN FOLLOWS PERFECTION

HYDRO PURIFICATION SINK

Hydroxyl water ion technology and circulating live water pump, wash thoroughly. Cleaning process controlled by computer program, all you need to do is tap the control buttons on the sink.

HYDRO PURIFICATION SINK

Hydroxyl water ion technology uses water as raw material without adding any chemical substances, and generates particle shower after the generator is powered on to split water molecules into hydroxyl radicals. The hydroxyl radical has super oxidation ability, which can effectively degrade the bacteria, pesticide residues and hormones on the food surface.

Hydroxyl water ion cleaning technology is a new cleaning technology based on active oxygen and plasma. Clean water is used in the purification process without additives. After cleaning, there is no harmful residue, avoiding secondary pollution. It is safe enough to effectively remove pesticides and bacteria.

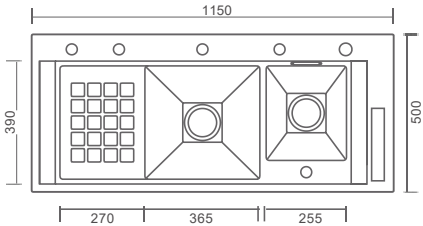

Focus on food purification
Deep sterilization, pesticide residue removal and hormone reduction

99.94%	96.2%	93%
Steam Sterilization	Removing pesticide residues	Reduce hormone residues

ACCESSORIES

Automatic Cleaning Function

Cleaning process controlled by computer program, all you need to do is tap the control buttons on the sink. Hydroxyl water ion technology and circulating live water pump, wash thoroughly.

Hydroxyl Water Ion Sterilization And Pesticide Degradation Function

Hydroxyl water ion sterilization and pesticide hormone degradation function helps sterilize and remove pesticide residues on vegetables and fruit efficiently and without pollution.

Cutlery Disinfection Function

Put the cutlery into the machine, sterilization and disinfection function can be completed simply and quickly.

Removable Accessory Design

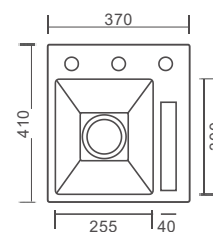

The machine is equipped with a washing basket for fruits and vegetables. After washing, the washing basket can be taken out, which is convenient and saves trouble and avoids secondary pollution.

STAINLESS STEEL FAUCET

Our enthusiasm and inspiration come from water! NBCM is dedicated to creating a more aesthetic and comfortable water experience for you. The emotional design will bring you a visual and tactile feast, and enjoy unparalleled pleasure in use. In order to make all design elements of the faucet powerful and coordinated, NBCM innovatively combined the faucet and shower in one design.

Enjoy your washing!
